

Dear Representative Theresa Wood,

Thank you for your concern regarding the Vaccine Schedule but.... it is a complicated one which I know very well that the CDC and the HHS is doing a very fine job with it.

Vaccines are very deadly and cause much harm. If you need the truth then it is important to do your own research.

There are tons of thoughtful well researched books out there by many highly educated individuals who know the harms that vaccines cause.

Here are a couple books:

Dr. Suzanne Humphries ***Dissolving Illusions: Disease, Vaccines, and the Forgotten History***

<https://drsuzanne.net/>

Vaccines Amen by Aaron Siri

<https://vaccinesamen.com/>

There is also a movie called An Inconvenient Study which you can find at

<https://www.aninconvenientstudy.com/>

Please ask yourself "Do I really know about vaccines, Do I know the side effects? Do I know the ingredients?

OR

Do I just ""BELIEVE"" in vaccines?

My guess is that you "Believe" in vaccines but you have never read the Vaccine insert that comes with every dose. The insert tells you of all the harm they can cause.

It is a waste of my tax money to start Vermont's own little CDC here in state. RFK jr is doing a GREAT job! You watch and see how much healthier Americans will be especially when they are not jabbed with vaccines made of toxic stuff.

Thank you for your service and thank you for your time,

Susan Bowen
